

Teaching with Digital Humanities Tools

Cynthia Heider, Public Digital Scholarship Librarian at Penn Libraries
heider@upenn.edu

Find these slides at <https://bit.ly/rdds-teaching-with-dh>

About Me

I'm **Cynthia Heider**, the Public Digital Scholarship Librarian at Penn Libraries.

I can help with:

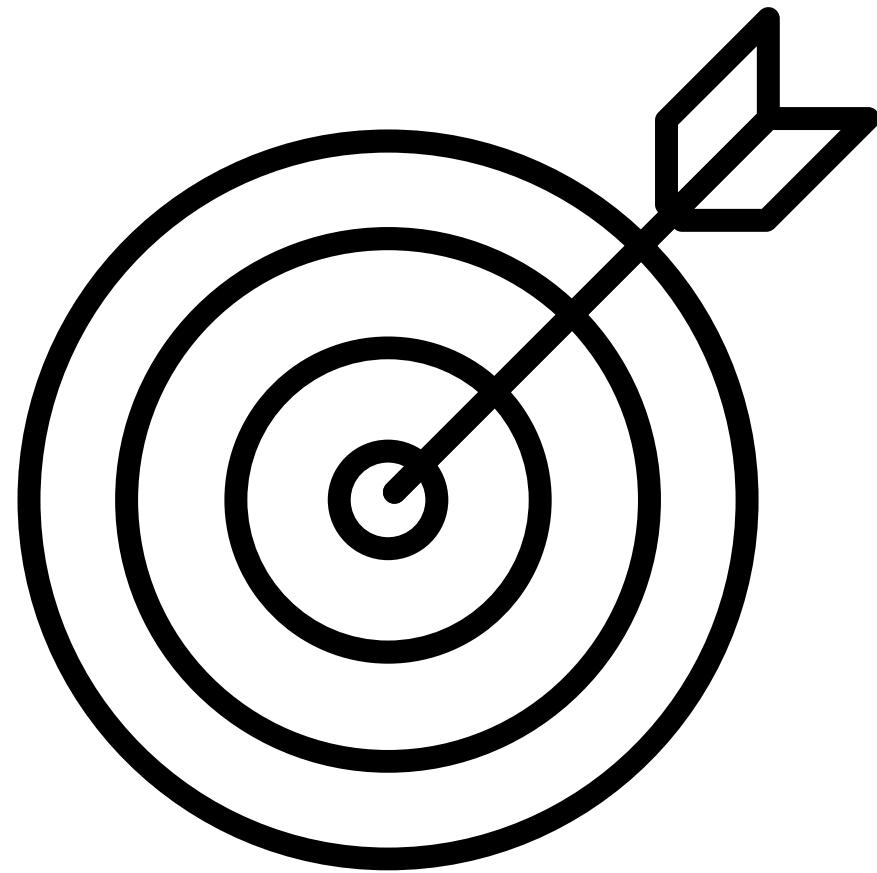

- Digital projects for public audiences
- Digital projects involving community partners
- Choosing the right tool or platform for your digital project
- Working with data in the humanities
- Connecting with digital project resources at and beyond UPenn

I do consultations and workshops beyond Penn!

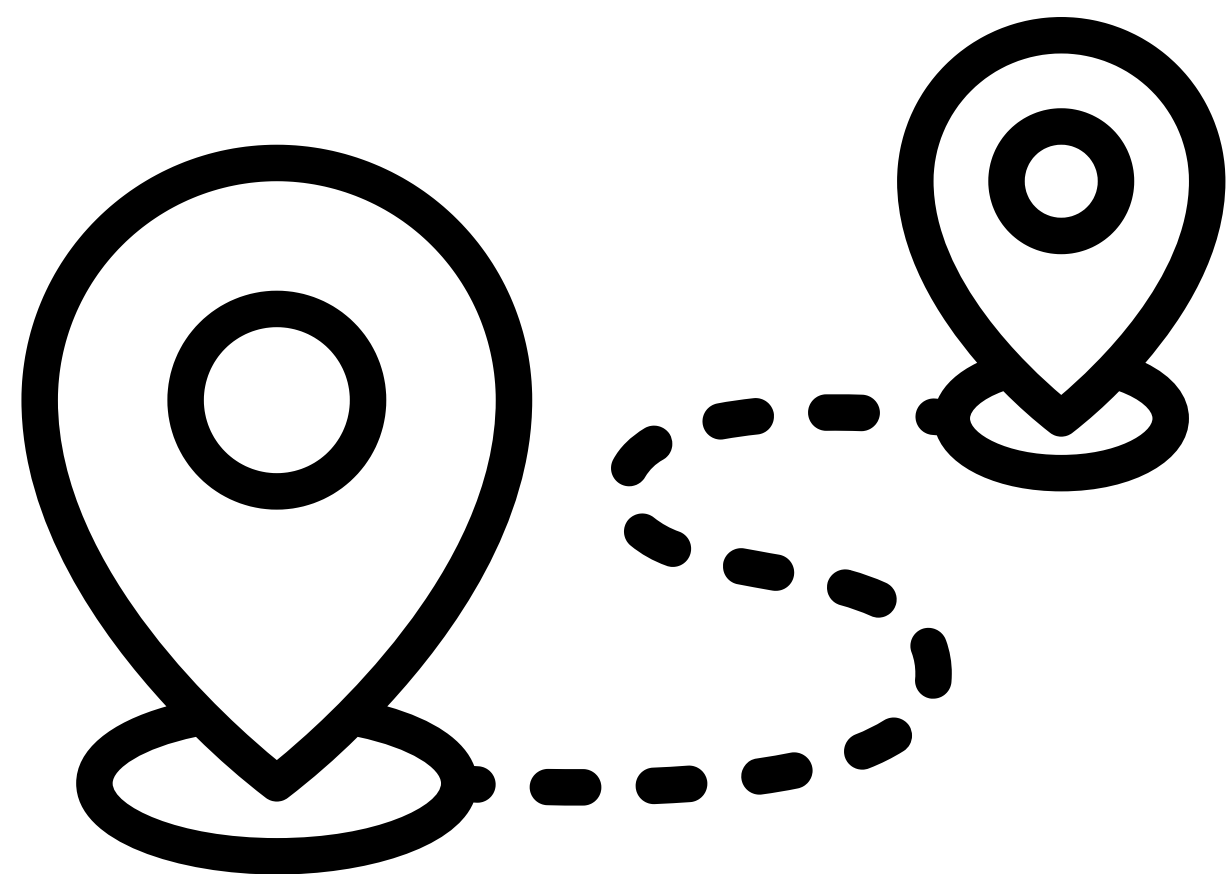

Email me at **heider@upenn.edu**

Workshop goals

- Define (“squishy”) digital humanities and what it can offer educators
- Identify some of the methods & tools used in digital humanities and how they could be incorporated in classes
- Try out some tools for yourself!
- Identify what evaluation might look like for assignments

Workshop Roadmap & Scope

- define digital humanities and its affordances
- introduce three common methods used in DH and examples, popular tools, and sample assignments associated with them
- practice with a tool for each method
- discuss assessment and grading of DH assignments

This is an entry point!

What's digital humanities?

Definitions

What Is Digital Humanities?

New quote

Quickly evolving interdisciplinary activity that not only transfers to digital media but also radically extends the potential uses and impacts of texts, cultural objects and other data.

Paris O'Donnell

NB: Click the New quote button to display a new random quote. Quotes were pulled from participants from the [Day of DH](#) between 2009-2014. As of January 2015, the database contains 817 rows and randomly selects a quote each time the page is loaded. If you want to do something cool with the data, I am providing the code and data [here](#).

Made by [Jason Heppler](#). Problems? Questions? I'm [@jaheppler](#) on Twitter.

What Is Digital Humanities?

New quote

Who the hell knows....I certainly don't **Ethan Watrall**

NB: Click the New quote button to display a new random quote. Quotes were pulled from participants from the [Day of DH](#) between 2009-2014. As of January 2015, the database contains 817 rows and randomly selects a quote each time the page is loaded. If you want to do something cool with the data, I am providing the code and data [here](#).

In brief

“Digital humanities is born of the encounter between traditional humanities and computational methods.”

(Burdick, Drucker, Lunenfeld, Pressner, Schnapp)

In practice

- Mapping, data analysis, parsing lots of text
- Digital exhibits, digital archives, podcasts, VR
- Communicating information

Just for fun

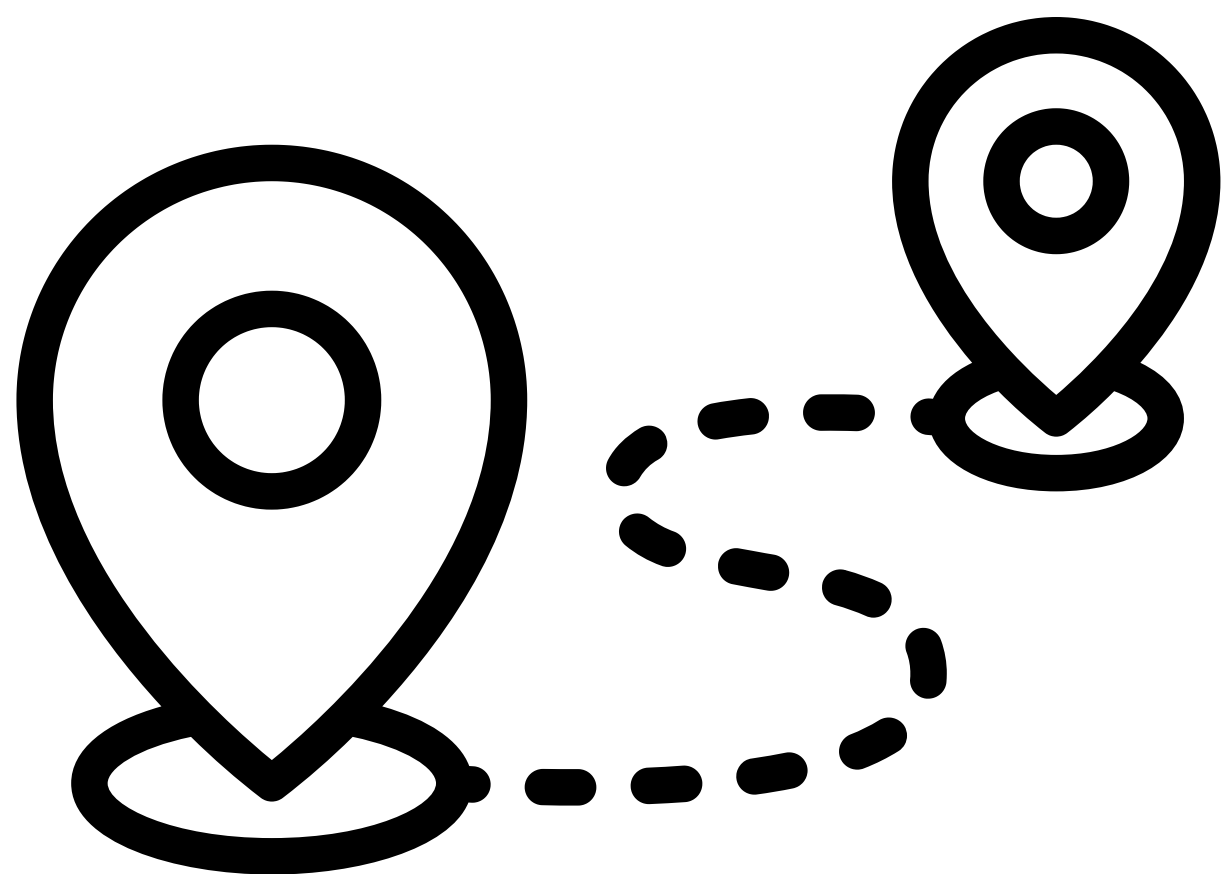

<https://whatisdigitalhumanities.com/>

Domains

- Research
- Analysis
- Interpretation
- Experimentation

Why do digital humanities?

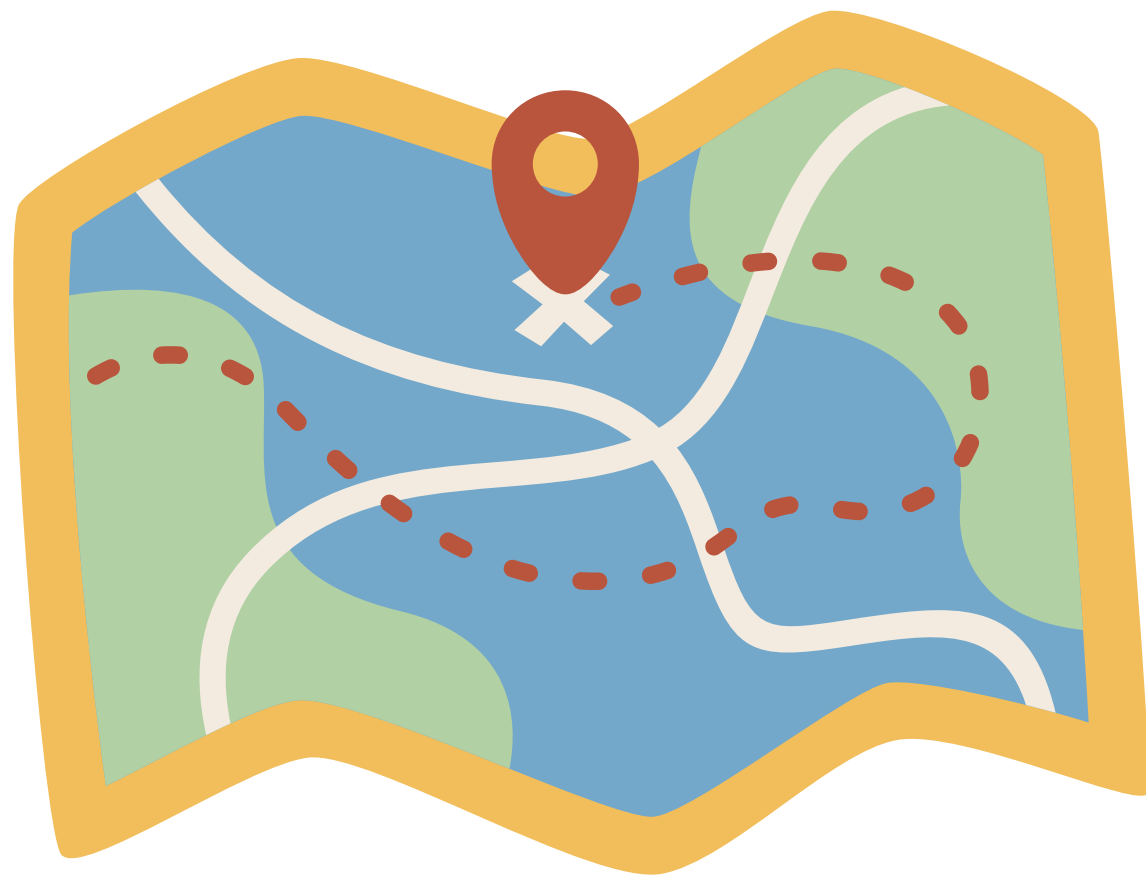

What the digital humanities can do

- Exploring research materials with different tools can lead to different research questions and/or deeper insights and understanding of materials
- Collaborative approaches to teaching and learning, as well as performing and sharing research
- Engage students to think deeply about source material
- Learning from the process of doing

Methods & tools

Mapping

Definition

Evaluation and interpretation of spatial data

- how do we understand and tell stories about place and space?
-

Popular Tools

- [Google MyMaps](#)
 - [HistoryPin](#)
 - [Clio](#) (walking tours)
 - [StoryMapJS](#)
-

Examples

- [Boston's Black Heritage Trail](#)
 - [Mapping Inequality: Redlining in New Deal America](#)
-

Sample assignments

- [From Text to Interactive Image: A Digital Mapping Project \(Rubric\)](#)
 - [Nineteenth-Century Slave Narratives - Building a Digital Story Map \(p.95\)](#)
-

Activity: StoryMapJS

1. Navigate to <https://storymap.knightlab.com/> and “Make a StoryMap”
 2. Sign in with Google and create a new project
 3. Pick two locations from [Ashley Bryan’s life](#) (listed below). Add info for each place on its own slide.
- Harlem, New York (birthplace)
 - Cooper Union School of Art and Engineering (educated)
 - Camp Myles Standish in Taunton, MA (basic training)
 - Columbia University (educated)
 - Universite d’aix-Marseille in Aix-en-Provence, France (educated)
 - University of Freiburg-im-Bresgau in Germany (educated)
 - Dartmouth College (taught)
 - Sugar Land, Texas (died)

Take 7 minutes!
I’ll give a 1 minute warning

Text analysis

AKA “distant reading”

Definition

Read bodies of text in new ways to pick up on word frequency patterns in texts

- uses machine learning, which powers most generative AI
-

Popular Tools

- [Voyant Tools](#)
 - [Google N-gram Viewer](#)
-

Examples

- [Hedonometer](#)
 - [Mining the Dispatch](#)
 - [The Data-Sitters Club: Voyant's Big Day](#)
-

Sample assignments

- [Distant Reading for K-12 Educators](#)
- [Sketch a Data Story](#)
- [Novel Analysis](#)
- [Reading at Scale: Teaching with Voyant, a Digital Humanities Tool](#) (p.61)

Demo: Voyant Tools

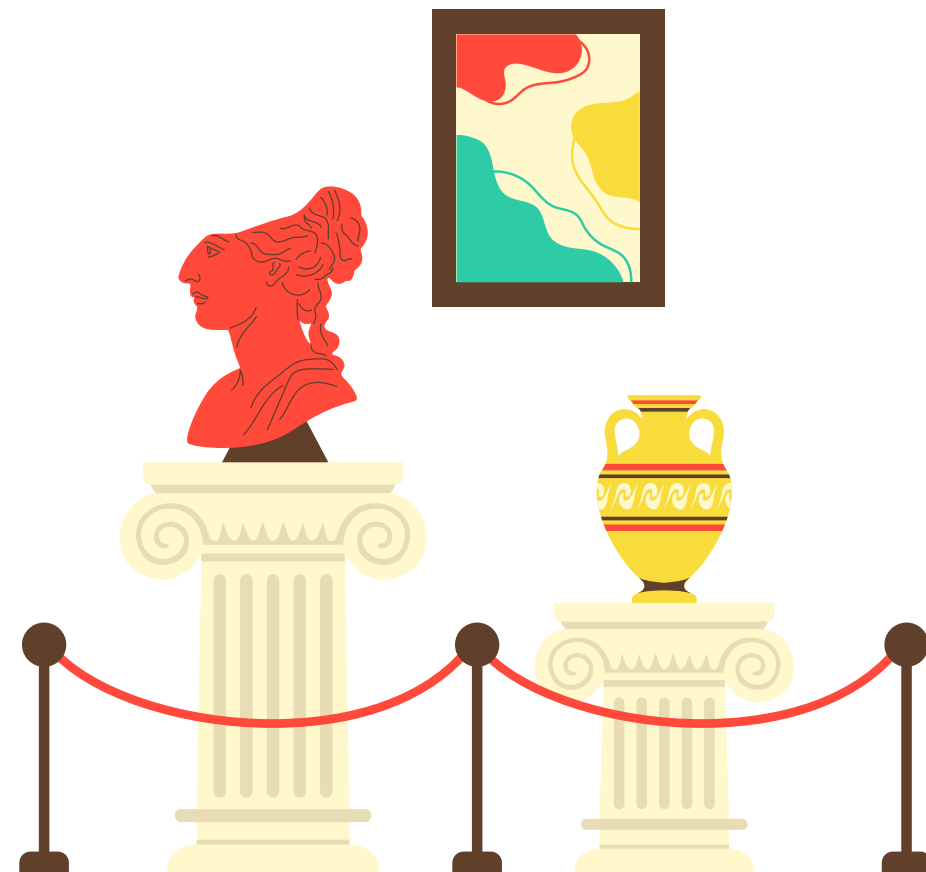

I'm going to demo it instead of having us go through an activity individually, but feel free to experiment on your own.

Elements of a Voyant analysis:

- Cirrus: a kind of word cloud showing the most frequent terms
- Reader: an efficient corpus reader that fetches segments of text as you scroll
- Trends: a distribution graph showing terms across the corpus (or terms within a document)
- Summary: a tool that provides a simple, textual overview of the current corpus
- Contexts: a concordance that shows each occurrence of a keyword with a bit of surrounding context

Digital storytelling

Definition

Combining elements of many modalities to compare, analyze and display items in context

- think podcasts, digital editions, exhibits, archives
-

Examples

- [What Jane Saw](#)
 - [A Civil Rights Turning Point](#)
 - [The Jane Addams Digital Edition](#)
-

Popular Tools

- [Rondo](#)
- [Omeka](#)
- [Scalar](#)
- [ArcGIS StoryMaps](#)
- [TimelineJS](#)
- [JuxtaposeJS](#)

Sample assignments

- [DIY Digital Edition \(Rubric\)](#)
 - [Basic Podcasting Assignment](#)
 - [StoryMaps Assignment Building](#)
-

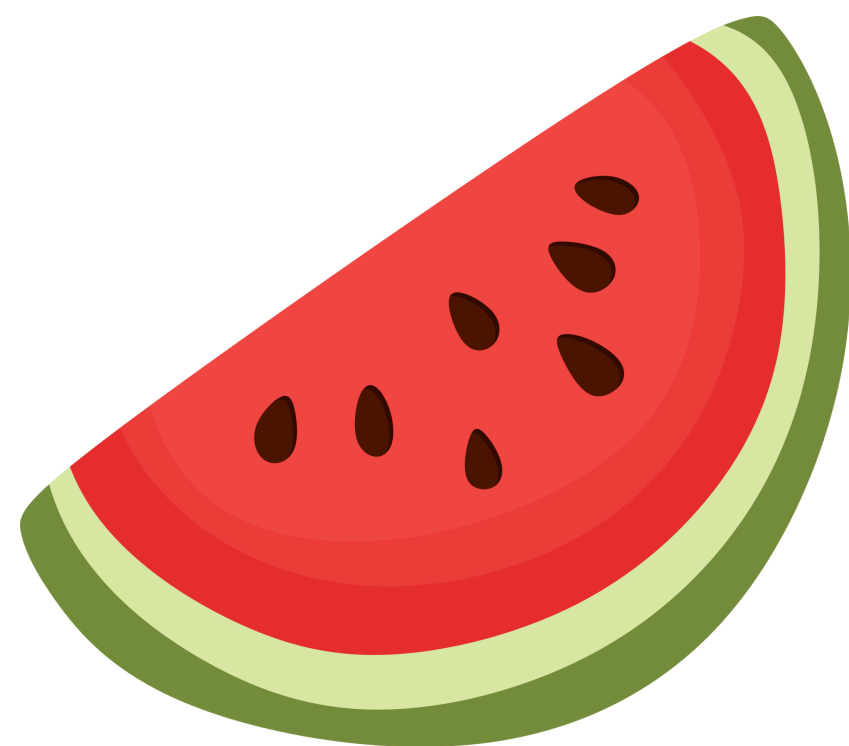

Activity: Rondo

1. Make a copy of the Rondo template at <https://bit.ly/4fD2AZG>
2. Choose an image from the Harvey Finkle collection at <https://digitalcollections.library.upenn.edu>
3. Fill out the last row of the spreadsheet with your image's information
4. Enter your spreadsheet ID and shareable URL at <https://sjsu-library.github.io/rondo/?page=builder>. **The spreadsheet ID is the long string of characters located between /d/ and /edit.**

Take 10 minutes!
I'll give a 1 minute warning

Other cool tools

Citizen science & citizen humanities

- [Zooniverse.org](#) projects
- [Smithsonian Digital Volunteers](#)
- [iNaturalist](#)
- [Transkribus](#)
- [StoryCorps](#)

Annotation & remixing

- [DocsTeach](#)
- [Perusall](#)
- [Hypothes.is](#)
- [GIF IT UP](#)
- [Gaming Like It's 1929 Game Jam](#)

**What other cool tools would
YOU recommend?**

Assessment & grading

Assessment considerations

Your assessment should be drawn **primarily** from the goals of the course, not from a student's level of mastery over technology (unless that is one of your learning goals)

Integration with learning goals

Scaffolding

Failure as pedagogy

Grading

Assignments should make clear exactly what parts of the project are important to student evaluation. Determine and communicate whether the emphasis is on the process or the aesthetics/usability of the end product.

Rubrics

Role of iteration and experimentation

Project components

Resources

[Using digital humanities in the classroom : a practical introduction for teachers, lecturers, and students](#)
(Battershill)

[Digital humanities pedagogy: practices, principles and politics](#)
(Hirsch)

[Doing Digital Humanities and Social Sciences in Your Classroom](#)
(Cutrara)
